LeighAnn,

I know these are only information meetings for the busses at this point. However, I am not sure if I will be able make any of the meetings and wanted to put my vote in as a 'yes' for the bussing. I think it would be a great opportunity for even more positive growth for Howard. I believe it might help to increase "green measures" by folks working at United Health to ride the bus vs. all the vehicles on the road (espeicallly with the closure of J from Hwy 29 - I live on J/Hillcrest Heights). For the second addition (and I would think even maybe another down the road) of the senior housing, it would be a great benefit to get to places like Woodman's. There are day care centers in the area that could utilize buses to get to places like the new Children's Museum and the Railroad Museum offering them education opportunities they might not otherwise be able to do. And additional use of the YMCA and library are wonderful bonuses.

I'm not sure how we would offset this cost or how many residents we have in Howard, but at \$100,000 - even if it was an extra \$10-\$20 on my taxes each year, I would be in support of it.

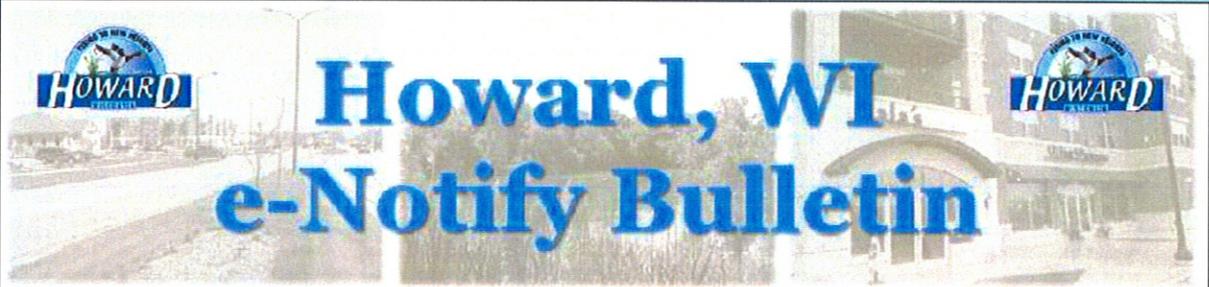

Sincerely,

Denise McGinnis
